

TOWN OF MASSENA
LOWER RAQUETTE RIVER
RIVER ACCESS PROJECT

Alcoa, in cooperation with the Town of Massena, plans to construct a recreational fishing area on the Raquette River for public use. The construction is part of a consent decree settlement between Alcoa and NOAA, DOI, NYSDEC, USFWS and the St. Regis Mohawk Tribe who serve as Trustees for natural resources under the consent decree. A recreational fishing assessment performed jointly by Alcoa and the Trustees determined that construction of updated and improved recreational boating facilities such as depicted below will compensate the public for lost recreational fishing opportunities due to fish advisories posted in the area.

Site
Amenities

Location:

- North Shore of Raquette River .
